Attn: Nigel Robinson, Project Officer

Re: Asbestos Disposal Sites  
Morris County, NJ

Dear Mr. Robinson:

Pursuant to our phone conversation on June 4, 1987, I am writing to inform you that we will begin collecting the first round of groundwater and surface water monitoring samples for the Asbestos Disposal Sites on June 16, 1987. Based on the results of the Remedial Investigation, the following indicator parameters have been selected for analysis: Priority Pollutant volatiles, base neutrals and metals, and asbestos fiber counts. Due to turnaround time problems anticipated for both York Laboratories and ETC, we will be using Enviropact, Inc. which can guarantee a four-week turnaround on the sample results. Enviropact is an EPA-certified laboratory for organics and inorganics.

Sincerely,

FRED C. HART ASSOCIATES, INC.
